

Press Release

MNH Sustainable Cabin Services Awarded **Virgin Atlantic Supplier Hero** at the ninth annual recognition awards held on 20th March 2013 at Café De Paris, London

The annual Virgin Atlantic Heroes Awards celebrate the people and a select number of suppliers who deliver day in, day out, have an endless passion for their work and really make a difference to the airline.

This year's finalists were all brought together at a prestigious awards ceremony in the heart of London's Piccadilly, where their outstanding achievements were celebrated.

Attended by senior members of Virgin Atlantic's team, MNH was short-listed from suppliers from around the world to win the coveted award of "Supplier Hero 2012" - which was collected by Matt Rance, Managing Director and Georgina Jackson from the UK Operations Team (shown right).

Matt Rance commented "It is a privilege to work in partnership with a truly pioneering team. This Award is an incredible achievement and the highest recognition we can receive from Virgin Atlantic for the level of service and our contribution to their environmental, financial and social objectives. It is a reflection of the hard work everyone that touches this account puts in on a daily basis".

Virgin Atlantic said MNH is a "**valued partner that we love to work with**". Only one supplier can win the Award each year and MNH joins a select few including last year's winner Rolls Royce.

MNH specialises in providing operational supply chain solutions for Kits, Laundry and Headsets. Using global best practice we are able to reduce financial and environmental wastage in these supply chains. Our whole life headset focus enables us to deliver airline clients between 10-20% savings on their total headset spend.

Last year alone in partnership with our airline clients we:

- Refurbished over 30 million headsets [The World's Largest]
- Diverted over 1000 tonnes of waste from landfill
- Repaired over 100,000 headsets
- Provided meaningful employment and rehabilitation for more than 500 people with learning disabilities

...whilst contributing £millions to our clients bottom line through cost reduction and cost avoidance initiatives.

Ends:

Editor's Notes:
